Total No. of Questions : 09

B.Sc. (Non-Medical) (Sem.-6)

ENGLISH-VI

Subject Code : BSNM-607-18

M.Code. : 79499

Date of Examination : 15-07-22

Time : 3 Hrs.

Max. Marks: 50

INSTRUCTIONS TO CANDIDATES :

1. SECTION-A is COMPULSORY consisting of TEN questions carrying ONE marks each.
2. SECTION-B contains FIVE questions carrying FIVE marks each and students have to attempt any FOUR questions.
3. SECTION-C contains THREE questions carrying TEN marks each and students have to attempt any TWO questions.

SECTION-A

1. Write briefly :

- a. What is Joe Keller's attitude towards Kate's belief?
- b. How did Larry's tree fall?
- c. What did Kate see in her dream?
- d. Correct the following :
The grammar of the sentence is not correct.
- e. Give one word substitution : A collection of birds
- f. Give one word substitution : A collection of books
- g. Change the narration : The lady said to the maid, "Who broke the jug"?
- h. Change the narration : Riya exclaimed with joy that it is a beautiful scene.
- i. Change the voice : Discipline should be maintained in the class.
- j. Correct the sentence : I and you will observe the affect of this chemical.

SECTION-B

2. Why does Kate have to believe that Larry is still alive?
3. How did Larry die, according to his letter?
4. What are the important points that should be kept in mind while preparing a power point presentation?
5. Paraphrase the following :

The current research extends the previous work by revealing that listening to moral dilemmas could elicit a FLE [foreign-language effect] in highly proficient bilinguals. Here, it has been demonstrated that hearing a foreign language can even influence moral decision making, namely promote more utilitarian-type decisions.

6. Interpret the following :

Single-use plastic water bottles cause dangerous substances to “leach” into the soil and water (Macklin). The bottles typically don’t begin to break down for one hundred years, or even longer. Their decomposition may be speeded up by extreme weather conditions, e.g., very hot or very cold temperatures. As they break down, they release dangerous chemicals like bisphenol-A into the soil. Bisphenol-A is an endocrine disruptor, i.e., it can affect the levels of hormones within the human body, creating disease. In addition, BPA is known to be carcinogenic (cancer-causing) in humans. As these chemicals accumulate in the soil, they eventually sink into the water table, contaminating the water (O’Connor). Making these threats even more frightening is the fact that there is currently no known technology for removing BPA and other leachates from the soil and water once they’re there.

SECTION-C

7. How does Larry’s letter shatter Joe Keller’s world view? What does Joe realize about his duty to the world at large that brings him to kill himself?
8. Suppose that you have been given the responsibility of the beautification of the University campus. Draft an action taken report, while including the details of expenditure.
9. Enumerate and explain the dos and don’ts to crack an interview.

NOTE : Disclosure of Identity by writing Mobile No. or Marking of passing request on any paper of Answer Sheet will lead to UMC against the Student.
